ALL TOPO MAPS: The Colorado Trail®

MSRP **\$40**

The 'Colorado Trail GIS Reference Map Series' ultimate trail coverage and detail.

The digital mapping resource for planning and traveling on "The Colorado Trail". Featuring incredibly high resolution images, the series allows map printing, image export, GPS interface and includes over 100 predefined atlas pages, ready for printing. The Reference Series User's Guide included a complete list of GPS waypoints and segment information.

- Every 7 1/2' 1:24,000, 1:100,000 and 1:250,000 scale USGS topographic map covering the entire 487 mile trail.
- Amazing trail accuracy! Over 466,000 control points—about one point every six feet for the entire trail.
- All Topo Maps: GPS Tool for up/downloading coordinates from the 1,225 included Colorado Trail waypoints
- "The Colorado Trail" Atlas Printer for printing very high resolution trail segment map images
- AllTopo viewing engine
- BigTopo: professional map seamer for building new map coverage
- The Reference Series User's Guide containing segment and waypoint information, a valuable resource for GPS enabled trail users

The Colorado Trail® Atlas Printer

Over 100, high resolution, high detail predefined atlas pages, ready for printing! Organized by trail section and mileage, the 'Atlas Printer' allows you to quickly printout the trail sections you need.

All Topo Map Viewer

Use the All Topo viewer to quickly find view, annotate, print and export the maps you need. Search by place, feature, geo-reference point or map name; 400+ levels of high-resolution zoom; easily export royalty free images and print portions or entire maps.

GPS Tool - transfer coordinates between the maps and your GPS receiver

The ALL TOPO MAPS: GPS Tool transfers waypoints, routepoints and trackpoints between your GPS and PC over the serial port. Mark waypoints on maps for transfer to your GPS or use your GPS to mark coordinates in the field and extract them onto the maps. Real-Time-Tracking plots your position as you travel. The GPS tool will help you organize your coordinates. Rated 'easiest to use' by Outside Magazine™

BigTopo map seaming tool

BigTopo quickly seams adjacent 7 1/2 minute scale quadrangles together, removing collars and generating large area custom coverage maps. BigTopo maps can be exported (royalty free!) with georeferenced world-files for use with GIS and CAD applications. Build huge, full resolution topographic maps that completely cover your trip or project's area.
